

ALAS Sessions

Why ALAS? Why Now?

AABIP is committed to inclusion, access, and international partnership for all attendees. The ALAS track was created to foster collaboration, expand access to advanced education, and engage a global community of interventional pulmonologists and bronchologists.

Introducing the ALAS Track

This year, AABIP is proud to introduce a groundbreaking addition: a dedicated Spanish-language track! For the first time, we're offering expert-led sessions entirely in Spanish, designed to incentivize global cooperation and provide valuable insights specifically for professionals in Latin America and Spain.

Why ALAS? Why Now?

AABIP is committed to inclusion, access, and international partnership for all attendees. The ALAS track was created to foster collaboration, expand access to advanced education, and engage a global community of interventional pulmonologists and bronchologists.

Featured ALAS Sessions

- **Advanced Diagnostic Bronchoscopy in Latin America and Spain:** Innovations, access, and case-based insights from leaders across Latin America and Spain.
- **New Treatments for COPD:** Exploring state-of-the-art therapeutic approaches and regional challenges in managing COPD.
- **The Role of Thoracic Ultrasound in Malignant Disease:** Practical insights, evolving techniques, and how ultrasound is reshaping diagnostics and care.

Simultaneous Translation

For the first time ever, AABIP 2025 will offer **PowerPoint subtitles in Spanish for all sessions in the program.**

This new feature is designed to make the cutting-edge content of our conference more accessible to a broader, international audience and ensure that everyone can fully engage with the groundbreaking insights and developments in the field of Bronchology and Interventional Pulmonology.

Please Note: While we are committed to enhancing accessibility, neither AABIP nor Kenes Group can guarantee the accuracy of the translation. We recommend attendees to be aware of the possibility of minor discrepancies in the translated content.

What's on the Agenda?

Advanced Diagnostic Bronchoscopy in Latin America and Spain: Innovations, access, and case-based insights from leaders across Latin America and Spain.

New Treatments for COPD: Exploring state-of-the-art therapeutic approaches and regional challenges in managing COPD.

The Role of Thoracic Ultrasound in Malignant Disease: Practical insights, evolving techniques, and how ultrasound is reshaping diagnostics and care.

Sessions Translated Live

AABIP is committed to inclusion, access, and international partnership for all attendees. The ALAS track was created to foster collaboration, expand access
